13 HER STORY

## HER STORY

**D**eep in a police archive, in the sickly glow of a buzzing CRT monitor, we're watching videos of a young woman talking to a detective. A series of interviews about a 1994 murder have been broken into hundreds of pieces and stored, out of order, in an archaic database. Now we're trying to piece them together. And although the clips are short, the more we see, the more we learn about the woman, the dead man, and the surrounding events.

If none of that sounds especially game-like, it's also worth noting that Her Story is set entirely on the desktop of an old PC. You sort through its labyrinth of video by searching for keywords, but there's no set path. The way its full-motion video narrative is told will be

different for everyone – you might find a clip in the first minute that we didn't uncover until the last hour. What's remarkable about this nonlinear structure is that, despite it, the story unravels in a way that feels natural – and with twists and turns that feel like they could have been scripted. You think you have it all figured out, then find a clip that makes you rethink the entire story. You hate the woman one minute, sympathise with her the next. You see something in a clip that has you frantically searching for one you found earlier that didn't make sense

but has suddenly become clear. It's a game about revelations.

**LOST IN THE SYSTEM**  
You can store clips to refer to later, or tag them with your own keywords, but there's no way of ever simply playing them in order. This means you have to piece the story together in your head, knowing you might be proven wrong at any moment by a passing contradiction or shocking reveal in another snippet. As such, Sam Barlow's game is as much about your interpretation of the story as the story itself. Is this what really happened, or are you projecting your own prejudices or insecurities onto this woman? When you find a clip, a square is filled on a database tracker – green for clips you've seen, red for ones you haven't. This gives you an idea of how much of the story you're missing, and you'll feel compelled to find every last morsel. You can 'finish' the game at any point, rolling the credits, but there's no clear, neat ending that explains everything, even if you find every clip. Your own version of events, based on the conclusions you've drawn, is the only closure you'll get. And it seems so easy at first. You type in words like MURDER and BODY. Lots of results come back and

“YOU THINK YOU HAVE IT ALL FIGURED OUT, THEN FIND A CLIP THAT MAKES YOU RETHINK THE ENTIRE STORY”

Viva Seifert, who plays the lead character, is a former Olympic gymnast, and currently plays drums and piano in the band Joe Gideon & The Shark
